Subject: formaldehyde review
Date: Thursday, June 18, 2015 1:06:14 PM

Robeena,

Linda mentioned that you and she discussed the status of the formaldehyde review. While I know that we have asked for (b) (5) to help with the review, I think that we need to continue on the project that we started, which is to develop (b) (5)

Before the CIR, you had made some progress, but much work is still needed to complete the review, and we can add the (b) (5), once they provide that to us. In the meantime, I would like to ask for you to continue the review, and to please send me a timeline for the completion of the various sections that need to be reviewed. Please send Kapal the sections that you complete, so that she may review these, and then send to me. We will put the piece together once we have everything.

I understand that there are parts that you are not expected to do, such as the risk assessment, but there are plenty of sections in the review that are focused on reporting the published toxicology data on formaldehyde, which you can complete. As mentioned before, this project is a priority, and must be completed before the next (b) (5) comes in. please provide a timeline for the completion of the various sections. This means you need to identify which sections need to be completed, and estimate how much time you will need for this completion. Please provide to Kapal the completed sections that you have already written. completed means that you have reviewed these, and based on your senior expertise, you consider these sections to be near final and not needing much editing.

Again, I am sure that Linda explained the importance of this review to you, and I am trying to follow up and make sure that this project is completed within expected timeline, to my satisfaction, and to the satisfaction of Linda. Thank you.

Regards,
Nakissa Sadrieh, Ph.D.
